

Pick the Plan That Works for You.

We make having a beautiful yard easy.
Choose our Silver, Gold or Platinum plan and get add-on services tailored to your needs.

	SILVER	GOLD	PLATINUM	ADD-ON
 <p>LAWN CARE: Our lawn care programs consist of eight treatments applied throughout the year that combine pre- and post-emergent herbicides to control weeds and fertilization to make your lawn greener, thicker, and healthier.</p>	✓	✓	✓	
 <p>SERVICE CALLS: If you have an urgent issue, contact us and a Certified Landscape Specialist (CLS) or a Manager will visit as soon as possible, free of charge, to check out the situation and develop a plan to get your lawn back on track.</p>	✓	✓	✓	
 <p>TREE & SHRUB CARE: Our program consists of several treatments throughout the year to protect ornamental trees and shrubs from insect damage and disease, make them more resilient, and give them a healthier look.</p>		✓	✓	
 <p>OUTDOOR PEST CONTROL: Our Outdoor Pest Control treatments help to eliminate many different types of insects. We'll spray the perimeter around your home to keep ants, ticks, fleas and spiders at bay.</p>		✓	✓	✓
 <p>ARMYWORM & GRUB PREVENTION: This preventative gets applied twice during the summer months to combat armyworms and grubs in your soil. Its effects last for 60 days, and it has little impact on beneficial insects you want to keep in your yard.</p>			✓	✓
 <p>FUNGICIDE TREATMENT: Brown patch and dollar spot are common, easily identified fungal threats. We will treat your lawn with a fungicide throughout the year so these diseases don't become a problem for you.</p>			✓	✓
 <p>GRASSY WEED CONTROL: A post-emergent herbicide is added to combat more difficult perennial weeds that cannot be controlled with pre-emergent applications included with the Silver plan.</p>			✓	✓
 <p>MOSQUITO CONTROL: The mosquito program consists of eight treatments, one applied every 30 days from March through October, to minimize the activity of mosquitoes in your yard. The treatment also includes a larvicide to keep eggs from developing into larvae.</p>				✓
 <p>FLEA & TICK CONTROL: We spray your lawn and wooded areas once a month during flea and tick season, which in the Atlanta area is April through October.</p>				✓
 <p>SPRING AERATION: Aeration removes plugs of soil, allowing water and air to get down to the roots. The result will be a thicker, healthier lawn. All warm-season grasses can benefit from this service.</p>				✓
 <p>FALL AERATION & OVERSEEDING: This treatment is recommended for Fescue lawns only and is performed between August and November. We aerate as described above, then "overseed," laying seed down over the existing lawn to help it grow thicker.</p>				✓
 <p>FIRE ANT CONTROL: We use a single application of TopChoice™ by Bayer for 12-month control of fire ants. It also has a short-term effect (30 - 45 days) on fleas, ticks, and crickets.</p>				✓

ARBOR-NOMICS®

More than treatments, we apply knowledge.
